

QUARTERLY ACTIVITIES REPORT MARCH 2024

Manhattan Corporation Limited (ASX: **MHC**) (**Manhattan** or the **Company**) is pleased to report on activities undertaken in the March 2024 quarter and its financial position at the end of the period.

HIGHLIGHTS

During the Quarter, work continued planning and access negotiations to advance the Chebogue Lithium Project in Nova Scotia Canada, where previous exploration has identified several low magnetic responses that may be associated with the occurrence of spodumene bearing pegmatite boulders at the Big Betty Prospect, that have returned significant Li₂O assays, including:

- Sample 85088A returned 3.40% Li₂O;
 - Sample 85567A returned 3.23% Li₂O;
 - Sample 85584A returned 3.19% Li₂O;
 - Sample 85584B returned 2.97% Li₂O;
 - Sample 85567B returned 2.41% Li₂O.
-
- Although MHC has been allowed access to conduct “Non-Ground Disturbing Activities”, the Company has been seeking relevant approvals to test the anomalies through pitting, costeaning and drilling from the Landholder, a forestry company. Due to the prolonged negotiations, MHC elected on the 25th of April to seek access under a statutory process through the Nova Scotian Provincial Government.
 - During the quarter MHC provided an update on its Ponton Uranium Project in Western Australia that hosts an Inferred Resource (JORC 2012) for the Double 8 uranium deposit of 26 million tonnes (Mt), for 17.2 million pounds (Mlb) grading 300ppm U₃O₈, (Refer ASX Announcement Dated 23 January 2017).
 - MHC is planning to seek Ministerial consent to commence further drilling to test the defined resource, extensions to the known mineralisation and evaluate the exploration targets of Stallion South, Highway South & Ponton.

Chebogue Lithium Project – Canada

The Chebogue Lithium Project is a large, 100% owned land position comprising an area of ~1,200 km² covering more than 100km of prospective lithium-bearing pegmatite strike. Chebogue is surrounded by excellent infrastructure and **located just 25km from deep sea shipping facilities at Yarmouth port** connecting the project to the Atlantic Ocean and global markets in North America and Europe.

Manhattan reported on 5 June 2023 the discovery of spodumene-bearing pegmatite boulders at its Chebogue Lithium Project with a further two occurrences reported on 8 August 2023.

The Company reported a further Fourth high-grade spodumene-rich boulder occurrence on 11 September, located approximately 1.6km south of Occurrence 2 and 1.1km North of Occurrence 3, all within the Big Betty Prospect.

The Company undertook a highly detailed drone aeromagnetic survey with survey lines spaced at 25 and 50m apart at an average height of 12m above the ground over the Big Betty Prospect late in the September Quarter 2023. Data was received during the quarter and processed by the Company's Geophysical Consultant during the Quarter.

The aeromagnetic survey outlined a number of low magnetic response anomalies that cover an approximate strike length of 30km that could represent pegmatite occurrences that may be associated with high-grade spodumene-rich boulder occurrences identified to date. This includes a central anomaly that covers an area ~200m wide by ~1km of strike that occurs adjacent to the recent spodumene bearing pegmatite discoveries.

During the quarter the Company aimed to complete negotiations of a Land Access Agreement with a Foreign Entity ("Non-Canadian") owned Forestry Company to undertake drilling, pitting and costeaning over the identified priority targets. Negotiations have become protracted and the Company has now elected to proceed through the Provincial Government's statutory process. The Company has invested heavily over the past months undertaking significant stakeholder engagement, including government and has been advised that its application for access will be received favourably.

This involves the Company making an application for Ministerial Intervention under the Mineral Resources Act of Nova Scotia whereby the Minister of Natural Resources can issue a special order granting surface access when landowners prohibit or limit access for mineral exploration, provided reasonable efforts have been made to obtain consent. The Ministerial decision balances economic benefits of resource development with landowner rights and concerns, aiming for a fair resolution that considers environmental, social, and economic impact.

About the Chebogue Lithium Project

The Chebogue Lithium Project consists of 109 Licences covering ~1,200 km² of ground having potential for lithium-caesium-tantalum (“LCT”) bearing pegmatites. Initial compilation work identified six target areas with three areas selected as locations for the start of exploration.

Detailed prospecting is now focused at the “BP” target licence and surrounding licences lying both to the north and south. Numerous sub-angular boulders have been observed on surface in this area. Exploration consisting of prospecting, soil sampling, and initial screening for spodumene flakes in glacial till is continuing in this licence area.

Historical surficial maps at the “BP” Target licence area indicates a relatively thin (<5m) cover of glacial till (Brushett, et.al., 2022)¹. Previous workers have documented three glacial dispersion directions in the region but work at the Brazil Lake pegmatites indicated a predominate ice flow direction from north to south.

The underlying geology at the “BP” Target area straddles metamorphosed Green Harbour Formation of the Goldenville Group to the east, progressing westward across the Chebogue Point shear zone, and into volcanics of the White Rock Formation. These volcanics occur immediately to the northeast along strike of the Brazil Lake pegmatites.

The Company believes that similar, NE oriented (~050°), spodumene-bearing pegmatites may occur further to the north and south of Brazil Lake along a northeast trending (~020°) stratigraphic sequence of metavolcanics and metasediments. This sequence of up to ~4 kilometres wide, runs parallel to, and to the west of the Chebogue Point Shear Zone.

1. Brushett, D.M., McClenaghan, M.B., and Paulen, R.C., 2022: Till Geochemical Data for Samples Collected in 2020 in the Brazil Lake Pegmatite Area, Southwest Nova Scotia, Canada (NTS 21A/04, 200/16, and 20P/13). 20p.

2. For details on the composition and Morphology of the Pegmatite Boulders and their relevant JORC Tables, please refer to ASX release dated 06/06/2023 – “Spodumene Discovery - Chebogue Lithium Project”.

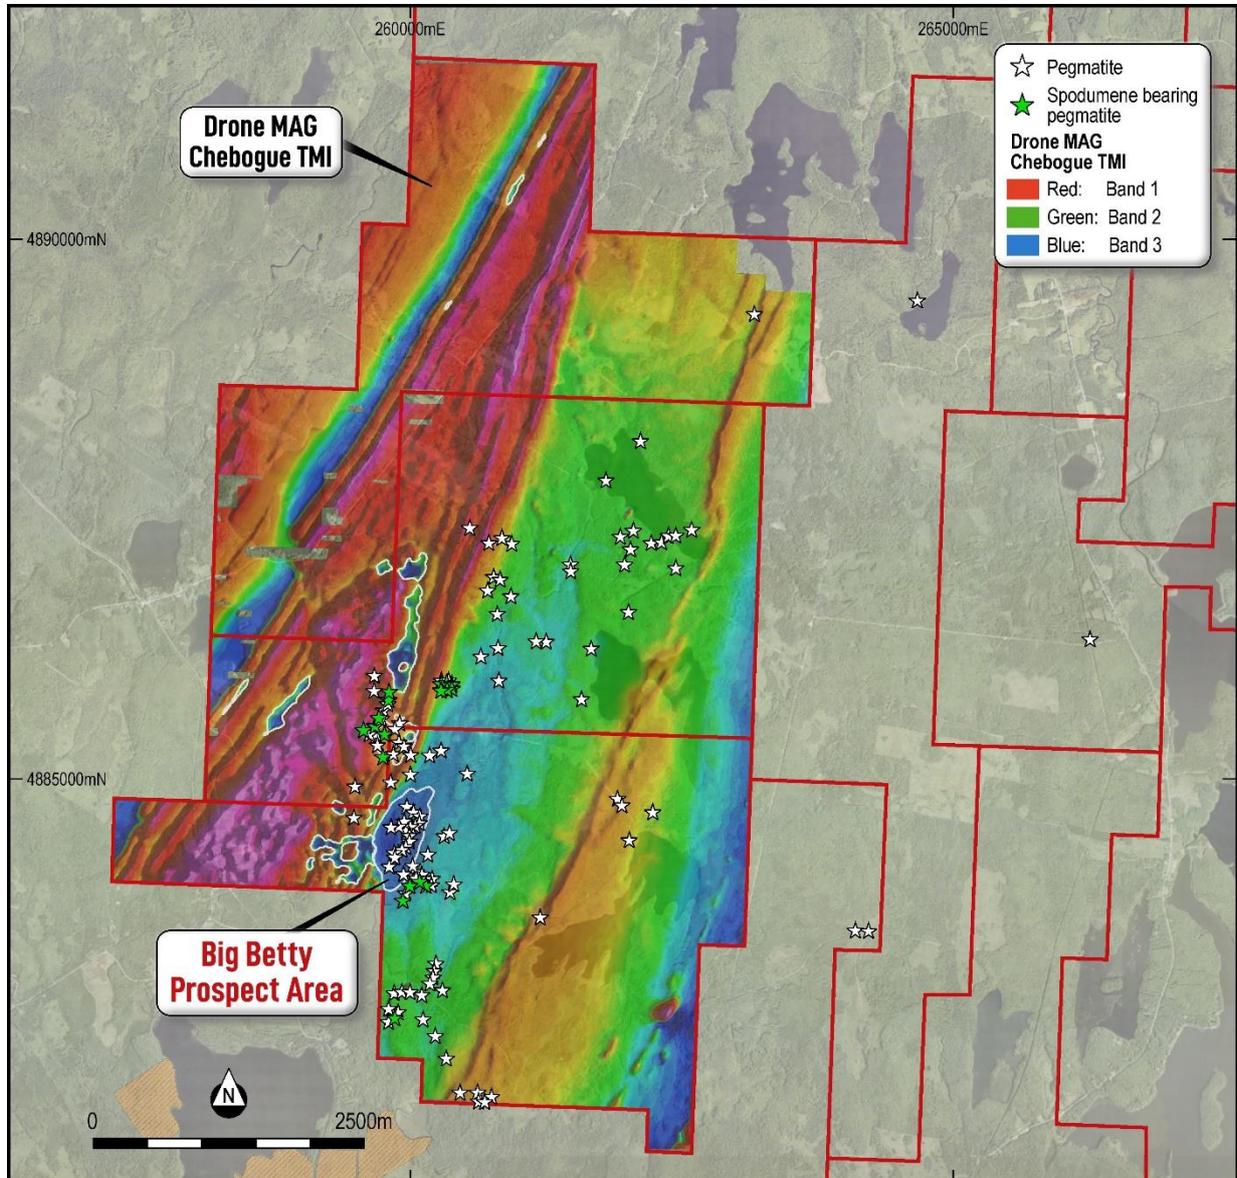

Figure 2- Overview map outlining all recently completed aeromagnetic survey (TMI - total magnetic Intensity image), highlighting low response magnetic features (white outline) in conjunction with known pegmatite occurrences.

Ponton Uranium Project – Western Australia

Manhattan's Ponton uranium project is located approximately 200 km northeast of Kalgoorlie (Figure 1) on the edge of the Great Victoria Desert in WA. The Company has 100% control of around 460km² (Figure 2) of exploration tenements underlain by Tertiary palaeochannels within the Gunbarrel Basin. These palaeochannels are known to host a number of uranium deposits and drilled uranium prospects (Figure 2).

1 <https://deepyellow.com.au/projects/australia/mulga-rock-project/>

Figure 3: Ponton Project Location

To date, the Company has drill tested and defined relatively shallow (50 to 70 meters deep) paleochannel sand hosted uranium mineralisation amenable to in-situ metal recovery (ISR).

On 23 January 2017 Manhattan reported an upgraded JORC Code (2012) Inferred Resource for the Double 8 uranium deposit at Ponton in WA of 26 million tonnes (Mt), for 17.2 million pounds (Mlb) grading 300ppm uranium oxide (U₃O₈) at a 200ppm cutoff.

MHC also reported on 23 January 2017 four exploration targets (Figure 2) with the potential to provide additional resources, namely:

- Extensions to the Double 8 Resource;
- Stallion South;
- Highway South; and
- Ponton.

Manhattan is waiting on the grant of a Retention Licence before seeking Ministerial Consent to recommence exploration at Ponton. Subject to this Consent being received, MHC plans to complete

further drilling to review the resource, test for extensions to the known mineralisation and to drill test the highly prospective exploration targets.

The Double 8 uranium deposit and the Double 8, Stallion South, Highway South and Ponton Exploration Targets are all located on granted exploration licence, E28/1898, located within the Queen Victoria Spring Nature Reserve (QVSNR), where ministerial consent is required to undertake exploration activities, or the Reserve boundaries need to be modified by a Reserves Amendment Bill in the WA parliament to exclude the area of the Double 8 Mineral Resource estimate from the Reserve to allow future exploration and development of the deposit. For more information on the Ponton Uranium Project please refer to our website at <https://manhattcorp.com.au/projects/ponton-uranium-project/>

For full details of reported Mineral Resource estimates for the Ponton Project refer to the Manhattan ASX announcement dated 23 January 2017 “Ponton Mineral Resource Estimates” and for further details of the Exploration Results and Exploration Targets see the announcement “Ponton Project Exploration Targets” dated 7 February 2014. Manhattan confirms that it is not aware of any new information or data that materially affects the information included in those announcements, and in respect of the Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the announcement continue to apply and have not materially changed.

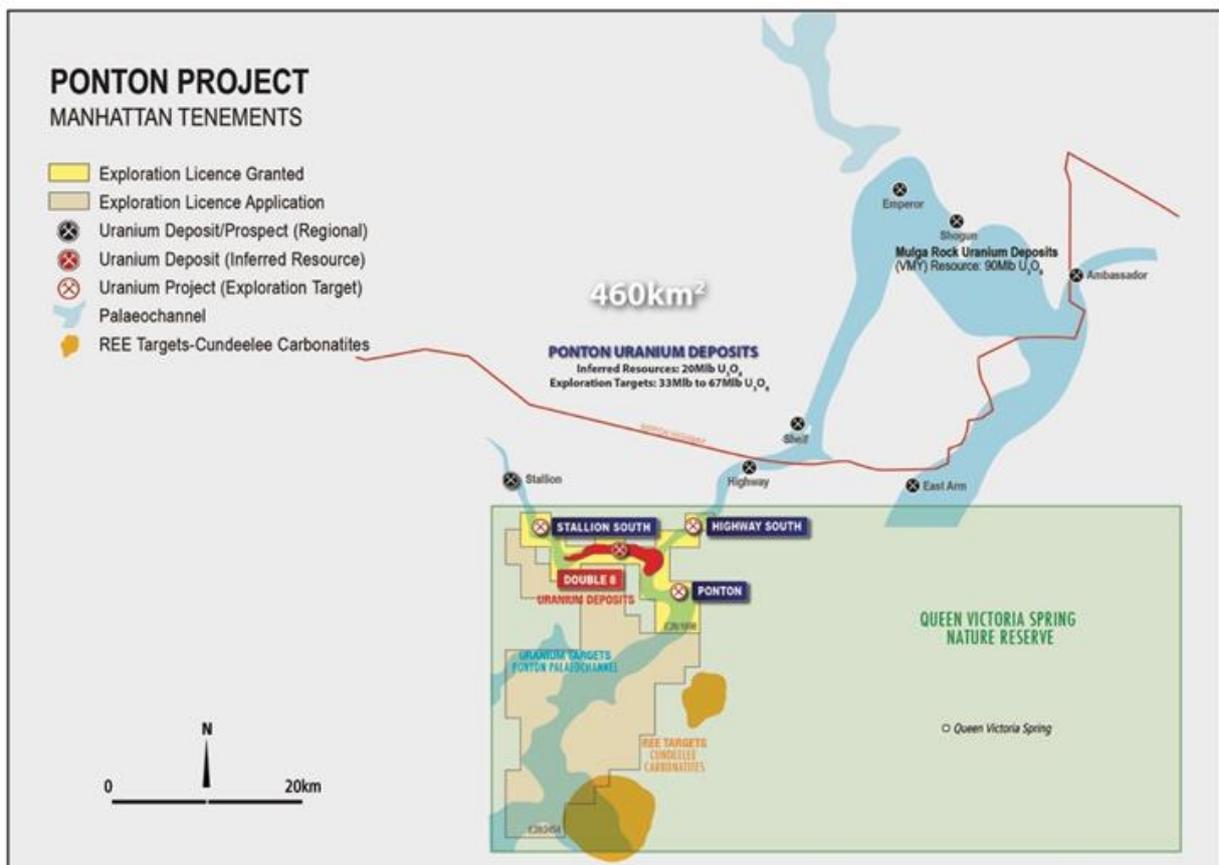

Figure 4: Manhattan’s Ponton Project

Corporate

Financial Position

On 31 March 2024, Manhattan had available cash of \$2.22 million and no debt, placing the Company in a strong position as it continues to pursue and assess its Projects.

Expenditure

The Company's major cash outflows for the March 2024 quarter included: -

- \$301,000 on Exploration and Evaluation expenditure with 85% of that spend directed to the Chebogue Lithium Project.
- \$148,000 on Administration and Corporate costs.

Related Party Expenditure (Items 6.1 and 6.2)

In the March 2024 quarterly Appendix 5B, the figure of \$67,000 as disclosed in sections 6.1 and 6.2 relates to Director fees for services provided during the quarter plus a prior quarter Director Fee previously missed of \$3,000; together with fees of \$24,000 charged by Mannika Resources Pty Ltd, an entity controlled by Kell Nielsen for the provision of consultancy CEO services engaged on specific project tasks together with \$7,044 in expenses reimbursement capitalised to Exploration and Evaluation expenditure.

Additional ASX Listing Rule Disclosures

Capital Structure

On 30 March 2024, 250,000,000 fully paid Ordinary Shares were released from voluntary escrow.

These Shares represent the balance of all the Shares to which voluntary escrow was applied at the time Manhattan negotiated the consideration for the acquisition of the Chebogue Lithium Project per the ASX release dated 6 February 2023.

There are no further Manhattan securities that are subject to escrow restrictions and the release of these Shares did not change the issued capital of the Company.

On 31 March 2024, the capital structure comprised:

	Fully Paid Shares	Unlisted Options	Performance Shares	Total Securities on Issue
Fully paid Ordinary Shares	2,936,979,775			2,936,979,775
Performance Shares			340,000,000	340,000,000
Unlisted Options @ \$0.02 expiring 30 March 2026		120,000,000		120,000,000
Unlisted Options @ \$0.01 expiring 30 March 2026		100,000,000		100,000,000
Unlisted Options @ \$0.04 expiring 30 March 2026		20,000,000		20,000,000
Issued Capital at end of March 2024	2,936,979,775	240,000,000	340,000,000	3,516,979,775

Tenements

ASX Listing Rules 5.3.2 and 5.3.3

Manhattan confirms that during the March 2024 quarter:

- There were no mining production and development activities undertaken;
- There were no farm-in or farm-out agreements entered;
- There were no changes to tenure for the Tibooburra or Ponton Projects as listed in Tables 2A and 2B;
- There were no changes to tenure for the Chebogue Project as listed in Table 2C.

JORC Code, 2012 Edition – Table 1

As required by ASX Listing Rule 5.7, the relevant information and Tables required for previously announced results under the JORC Code can be found in the following announcements.

Chebogue Lithium Project

In reference to sampling results and the drone magnetic survey from the Chebogue Lithium Project, please refer to the announcement reported by MHC as follows:

- 3 July 2023 – “High Grade Spodumene sampled up to 2.24% Li₂O”,
- 8 August 2023 – “New Spodumene Pegmatite Discovery”,
- 11 September 2023 – “High-Grade Lithium Assays up to 3.40% Li₂O” and
- 30 January 2024 – “December 2023 Quarter Activities Report”.

Ponton Uranium Project

In reference to the Ponton Uranium Project, please refer to the following releases:

- 18 January 2024 – “Ponton Uranium Project”
- 23 January 2017 – “Ponton Mineral Resource Estimates”
- 7 February 2014 – “Ponton Project Exploration Targets”

Competent Person’s Statement

The information in this report that relates to Exploration Results and Mineral Resources is an accurate representation of the available data and is based on information either compiled or reviewed by Mr Kell Nielsen who is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Nielsen is a Director and Chief Executive Officer of Manhattan Corporation Limited. Mr Nielsen has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person (CP) as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Nielsen consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward looking statements

This announcement may contain certain ‘forward looking statements’ which may not have been based solely on historical facts, but rather may be based on the Company’s current expectations about future events and results. Forward-looking statements contained in this announcement include, but are not limited to: completion of the Acquisition; the strengths, characteristics and potential of the Company following completion of the Acquisition; timing and receipt of shareholder approvals; completion of the Capital Raising; discussion of future plans, projects and objectives and statements about the outcome and effects of the Capital Raising and the use of proceeds.

Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward looking statements are subject to risks, uncertainties, assumptions, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by such forward looking statements. Such risks include, but are not limited to third party actions, metals price volatility, currency fluctuations and variances in exploration results, ore grade or other factors, as well as political and operational risks, and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company's Annual Reports, as well as the Company's other releases. The Company does not undertake any obligation to release publicly any revisions to any 'forward looking statement' to reflect events or circumstances after the date of this announcement, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

Reliance on third party information

This announcement contains information derived or obtained from third parties. No representation or warranty is made as to the accuracy, completeness or reliability of the information. This document should not be relied upon as a recommendation or forecast by the Company.

In particular, this announcement contains information taken from NI 43-101 Technical Report on the Mineral Resources Estimate for the Brazil Lake Project (Lithium-Bearing Pegmatite Deposit) Nova Scotia, Canada, prepared for Champlain Mineral Ventures Ltd, by Michael Cullen P.Geol., Matthew Harrington, P. Geol., and Lawrence Elgart, P.Eng, of Mercator Geological Services, dated 25 April 2022 and prepared in accordance with the requirements of National Instrument 43-101 – Standards of Disclosure for Mineral Project of the Canadian Securities Administrators reporting instrument codes. The information in that report relates to the Brazil Lake Project and not the Chebogue Lithium Project that the Company is proposing to acquire. There can be no guarantees or certainty that exploration work on the Project will return similar results or that exploration work will result in the determination of mineral resources or that the production target itself will be realised.

4.6	Cash and cash equivalents at end of period	2,222	2,222

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	2,222	2,652
5.2	Call deposits	-	-
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	2,222	2,652

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	36
6.2	Aggregate amount of payments to related parties and their associates included in item 2	31

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

6.1 – Director fees included in consultants and corporate costs for services provided during the March 2024 quarter plus September 2023 Director Fee previously missed of \$3,000.

6.2 – CEO fees (\$24,000) for services provided together with reimbursement of expenditure (\$7,044) capitalised to exploration and evaluation costs for June to August 2023.

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i>		
<i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end	Not Applicable	
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(140)
8.2 Capitalised exploration & evaluation from investing activities) (item 2.1(d))	(301)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(441)
8.4 Cash and cash equivalents at quarter end (item 4.6)	2,222
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	2,222
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	5
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?
Answer: Not Applicable.	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?
Answer: Not Applicable.	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
Answer: Not Applicable.	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 April 2024

Authorised by: By the Board of Manhattan Corporation Limited
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
